Alerts

Name	Risk Level	Number of Instances
X-Content-Type-Options Header Missing	Low	1
Tech Detected - Uvicorn	Informational	1

Alert Detail

Low	X-Content-Type-Options Header Missing
Description	The Anti-MIME-Sniffing header X-Content-Type-Options was not set to 'nosniff'. This allows older versions of Internet Explorer and Chrome to perform MIME-sniffing on the response body, potentially causing the response body to be interpreted and displayed as a content type other than the declared content type. Current (early 2014) and legacy versions of Firefox will use the declared content type (if one is set), rather than performing MIME-sniffing.
URL	http://127.0.0.1:8000
Node Name	http://127.0.0.1:8000
Method	GET
Attack	
Evidence	
Other Info	This issue still applies to error type pages (401, 403, 500, etc.) as those pages are often still affected by injection issues, in which case there is still concern for browsers sniffing pages away from their actual content type. At "High" threshold this scan rule will not alert on client or server error responses.
Instances	1
Solution	Ensure that the application/web server sets the Content-Type header appropriately, and that it sets the X-Content-Type-Options header to 'nosniff' for all web pages. If possible, ensure that the end user uses a standards-compliant and modern web browser that does not perform MIME-sniffing at all, or that can be directed by the web application /web server to not perform MIME-sniffing.

CWE Id	693
WASC Id	15
Plugin Id	10021

Informational	Tech Detected - Uvicorn
Description	The following "Web servers" technology was identified: Uvicorn. Described as: Uvicorn is an ASGI server implementation for Python web applications, commonly used with frameworks like FastAPI to enable asynchronous and high-performance handling of web requests.
URL	http://127.0.0.1:8000
Node Name	http://127.0.0.1:8000
Method	GET
Attack	
Evidence	uvicorn
Other Info	The following CPE is associated with the identified tech: cpe:2.3:a:encode:uvicorn:*:*:*:*:*:*.*
